

# The Aero Strong Seat

Patent pending GB 2622754

## The world's first non-welded vehicle passenger seat

### Zero welding

Industry leading fully bolted construction, safe, secure and environmentally friendly.

### Lightweight

Strong, lightweight structure using HSS steels. No potential for cracking or cold welds.

### Easy maintenance

Fully zipped back and cushion cover for easy removal to wash and / or replace.

### External mounted seat belt

Low potential for jamming and replaceable without seat deconstruction.

### Top grab handle

Robust and durable top grab, built to withstand daily usage.

## NMI Quality

The Aero Strong Seat is part of the Aero Strong family of seating solutions, delivered by the same high quality standards of all NMI products.

Fast delivery | Experienced assembly team | Excellent service
